The Journal of the Society of Automotive Engineers

JULY, 1926

INDEX TO VOLUME XVIII

January-June, 1926

THE SOCIETY OF AUTOMOTIVE ENGINEERS, INC.
29 WEST THIRTY-NINTH STREET
NEW YORK CITY

THE JOURNAL OF THE SOCIETY OF AUTOMOTIVE ENGINEERS

INDEX TO VOLUME XVIII, JANUARY-JUNE, 1926

	PAGES
January	1-70
February	71-236
March	237-330
April	331-406
May	407-526
June	527-658

A

Acceleration

Chronograph recorder 595
Deceleration and 30
Recorder 595
Smooth, and high speed wanted 383

Accelerometers

Calibration 598
Calibration and check-test 587
Calibration-apparatus 596
Constant, characteristics 595
Contact
Applications 251
Battery of cells versus single 248
Development 248
Diaphragm type 249
Dynamic tests 250
Influence of contact opening 251
Methods of indication 248
Micrometer type 249
Impact tests 584
Inter-comparison 598
New 593
Recording devices for contact 594
Accessibility, design motor vehicles for 638

Accidents

Deaths and, due to poor visibility of headlights 618
Night, percentage reduced one-half 400
Accuracy of tooth profile, lead-angle and spacing 653
Acid formed from sulphur in fuel 36
ACKER, GEORGE H, ON SUITABILITY OF WORM GEARING 450
Actuation factor of floating-cam brakes 295
Actuation of point at toe of shoe 292
Actuation versus energization 289
Actuation versus energization of cam pressure on brakeshoe 289
Adaptation of worm gearing to passenger cars (L R Buckendale) 451

Addresses

Baer, Bugs 562
Brisbane, Arthur 563
Carter, Solon J 562
Horning, H L, 79, 85
Jordan, E S 79
Kettering, C F 563
Litle, T J, Jr 79; 338, 531
Rickenbacker, E V 562
Administration by states, problems of motor-vehicle 605
Administrative committees, S A E, personnel 233
Advisory Committee on Automobile Locks, S A E, personnel 302
Aerial navigation (Bradley Jones) 567
Aerial photography (George W Goddard) 78
Aerial photography and map-making 12
Aerodynamic analysis of airship 120

Aeronautic Division, S A E

Activities 348
Personnel 299, 508
Semi-annual meeting report 411
Subject assigned 508

Aeronautic Meeting, S A E

Announced 334, 443, 446
Arrangements progressing 532
Plans progressing 563
Aeronautic Safety Code Sectional Committee, representatives 514
Aeronautic session at annual meeting 94
Aeronautic topics at annual meeting 3

Aeronautics

Airplane and airship: their spheres of economic usefulness 94, 175, 397
Economic spheres of usefulness of airplane and airship 94, 175, 397
Agricultural Power Equipment Division, S A E
Annual meeting report 17, 252
Personnel 299

Air

Blower moves entire volume rapidly 136
Chilled by ammonia cooling-coils in refrigerated laboratory 135
Dry at all times in refrigerated laboratory 135
How engine, is controlled in laboratory 134
Relief-valve 156

Air-Cleaners

Application to internal-combustion engines 8
Auxiliary inlet for high engine-speeds 9
Objections to some types of 8
Requirements of an ideal 9

Air-Cooled Engines

Advantages of 511
Early, ignored in aviation 619
Limited by radiation surface 621
Navy radial 512
Radial, construction 511
Water-cooled versus 510

Aircraft

Aerodynamic efficiency 176
Airplane and airship: their spheres of economic usefulness 94, 175, 397
Comfort 180
Comparison of *L/D* ratios 176
Comparison of useful fields 179
Correcting moment 180
Dangers of landing 184
Depreciation 184
Development on the Pacific coast 568
Dissimilar characteristics of airplanes and airships 175
Distribution of weight 178
Economic spheres of usefulness of airplane and airship 94, 175, 397
Engine industry achievements 466
Engine stoppage 184
Engines 193
Government program regarding civil and industrial uses of 46
Increase of dead-weight with size 178
Initial cost 182
Initial percentage of useful load 181
Insurance and safety 182
Long-distance voyages 180
Operating-costs, relative 182
Percentage of dead-weight to gross load 181
Powerplant weights 178
Relation of weight to load 178
Similar characteristics 181
Size 178
Size and weight considerations affect engines 510
Steam-cooling applied to 109
Vertical bodily displacement 181
Aircraft development on the Pacific coast (Frank T. Lahm) 568
Aircraft-engine-industry achievements 466
Aircraft-engine relations to the needs of naval aviation (Lieut Hugo Schmidt) 509

Aircraft Engines

Advantages of air-cooled 511
Air-cooled versus water-cooled 510
Construction of radial air-cooled 511
Different materials used 247
Early air-cooled ignored 619
Fuel consumption and serviceability 511
Future trend 247
Lightness, can sacrifice, for fuel economy 621
Navy radial 512
New types of 466
Objections to large radial 621
Progress in design 246
Reliability most important in commercial work 620
Requirements 510
Size and weight considerations affect 510
Solution of big-end-bearing problem 620
Some aspects of development 619
Air-fuel ratios, torque effects with varying 259
Air Mail Service, airplane inspection system 386
Airplane and airship: their spheres of economic usefulness (H F Parker) 94, 175, 397
Airplane-engine maintenance (C W Bettis) 246
Airplane photographic exhibition at semi-annual meeting 443
Airplane supercharger (A W Gardiner) 447

Airplanes

Airships and: their spheres of economic usefulness 94, 175, 397
Amphibian development 455
Commercial future of amphibian 461
Dayton section members come to semi-annual meeting by 550
Dissimilar characteristics of airships and 175
Economic spheres of usefulness of airship and 94, 175, 397
Engine maintenance 246
Estimate height of photographic 541
Fixed charges about $75 per hr. 387
Ford cost figures questioned 387
Historical resume of amphibian development 456
Loening amphibian, development of 458
Profit-paying 11
Progress in engine design 246
S A E members photographed from 540
Selling price of Stout 386
Service uses of the Loening amphibian 460
Sky-writing advertising 11
Some aspects of inspection 523
Airports, equipment 574
Air-pump, slow-speed short-cylinder 220
Air service, time interval of 179

Airships

Aerodynamic analysis 120
Airplanes and: their spheres of economic usefulness 94, 175, 397
Automatic valves, purpose of 183
Comparison of stability and control 128
Condensed list of references 130
Data on water model of MC-2 129
Demonstration metalclad unit MC-2, general characteristics of 130
Dissimilar characteristics of airplanes and 175
E-H hull curve 128
Economic spheres of usefulness of airplane and 94, 175, 397
Estimated engine and, depreciation 385
Formulas for hull stresses, general 127
Full inflation in horizontal position 127
Gas pressure 183
German experience with metal-covered 95
Hydrogen burning 177
Hydrogen versus helium 183
Hull and fins, improved 121
Hull construction 123
Inclined to horizontal 128
Internal pressure control 122
M C-2
General characteristics 130
Water model data 129
Metal and fabric hulls, comparison of 125
Metalclad rigid development 94, 117
Operation 124
Partial inflation 128
Procedure, usual valve 183
Progress of development of metal 118
Reserve strength 122
Resistance as affected by fineness ratio 129
Routine of inspection 386
Shenandoah 182
Theory of structure 119
Transverse shape of envelope 126
Valve system of Shenandoah 94
Variation of *L/D* ratio with speed 176
Waste of lifting-gas 176
Water recovery 177
Airways, equipment 574
ALLEN, H H, ON EFFECT OF CHANGES OF TEMPERATURE OF BRAKE-LININGS ON THEIR PERFORMANCE 96
Alloy-steels, elements used in manufacture 10

Aluminum

Cylinder-head of cast 219
Welding of 392
Amendments to section constitution, by-laws and rules, proposed 281
American versus British rims and tire 623

Amphibian Airplanes

Commercial future 461
Development 93, 455
Historical resume of 456

Interesting commercial use foreseen 94
Loening, development of 458
Service uses of the Loening 460
Trend of development 93
Amphibian-airplane development (Grover C Loening) 455
Analysis of machine-tool maintenance (A R Kelso) 320
Analysis of operating costs of automotive equipment (Joseph Scott) 367

Annual Dinner, S A E

Announcement of 1927 533
Horning, H L, address 79
Jordan, E S, address 79
Litle, T J, Jr, address 79
1926 reviewed 79
Speakers announced 3

Annual Meeting, S A E

Aeronautic session 94
Aeronautic topics 3
Announcement 533
Automobile supercharger session 81
Body production session 4, 97
Brake session 4, 96
Business session 85
Carnival
Announced 3
Reviewed 112
Election of officers 80
Engine session 4, 99
Exhibits and demonstrations 6
Fuels and lubrication session 4, 109
Headlighting symposium 4
Horning, H L, address 85
Litle, T J, Jr, remarks 91
Meetings Committee
Meeting 111
Report 86
Membership Committee report 87
Motorcoach session 4, 104
Production session 6, 110c
Program 5
Publication Committee report 89
Research Committee
Meeting 111
Report 88
Research session 3, 83
Reviewed 81
Sections Committee
Meeting 110d
Report 89
Standards Committee
Meeting 17, 85
Report 87
Supercharger session 3
Technical sessions 3
Treasurer's report 92
Vapor-cooling session 4, 106
Anti-freeze solutions and compounds (H K Cummings) 548
Anti-freeze solutions session at semi-annual meeting 442, 548
Anti-freezing solutions 116
Anti-knock problem, vapor-phase phase of the 454
Application of air-cleaners to internal-combustion engines (H L Mills) 8
Application of group bonus to non-productive labor (Joseph Lannen) 110c
Apprenticeship, why it pays 606
Arms, engine support, standard revised 423
Army-Navy standards approved 411
Ash wire-wheel 630
Asturias 232
Attendu heavy-oil engine (Andre C Attendu) 99, 214
ATTENDU, ANDRE C, ON ATTENDU HEAVY-OIL ENGINE 99, 214
Auburn cars, improvements in (J M Crawford) 75
Authority of standards department 366
Automobile head-lamp light-characteristics and improved distribution (Walter D'A Ryan) 351
Automobile supercharger session at annual meeting 81

Automobiles

Auburn improvements 75
Buick improvements 75
Cadillac improvements 75
Cannot dispense with change-speed gears 520
Cleveland improvements 76
"Coaches" and "broughams" 485
Coincidental locking devices 568
Design standardization for simplified service 268
Developments that may come 241
Effect of high temperature of "evaporation cooling" on engine and 106
Engineers design for low production-cost 270
Exportation of 343
Exports of 481
Flint improvements 76
Franklin changes 76
Head-lamp light-characteristics and improved distribution 351
High average operating-temperature and engine and 255
Hot-spot of light for high-speed driving 353
How performance can be bettered 337
Lincoln changes 76
Locomobile improvements 76
Low-temperature testing 83
Magnitude of the equilibrium dilution for various cars 166
Marmon improvements 76
Mercedes 24-100-hp. supercharged 518
Miller front-drive 545
Nature and sources of pigments used in coloring 97
Obsolescence a major item of cost 369
Operators can improve performance, how 337
Practical application of superchargers to engines 516
Present and possible improvements by manufacturer 337
Proving grounds of the General Motors Corporation 12, 27
Public and the modern 339
Racing has improved engines 6
Rickenbacker improvements 76
Routes to semi-annual meeting 444
Stutz improvements 76
Supercharger development for 194
Supercharger, problem of the 518
Today and tomorrow 241
Training of repairmen 384
Underslung worm-drive 551
Velie improvements 76
Worm gearing, adaptation to 451
Automobiles of today and tomorrow (Herbert Chase) 241
Automotive engineer, motor-transport-field opportunities for the 463

Automotive Equipment

Analysis of operating costs 367
Method of determining economic life 368
Automotive industry 622

Automotive Industry

Color harmony in 97
Does not pay enough for machines 318
Future problems in 339
How far standardization goes 280
Machine-tool needs of the 316
Must pay price of machine-tools 279
Neglecting an opportunity 480
Research and 115
Splendid opportunities in 481
Training of future executives 451

Automotive Proving Grounds

Activities 29
Concrete test-hill roads 28
Standard test-program 29
Testihg courses 28
Automotive proving grounds of the General Motors Corporation (O T Kreusser) 12, 27

Automotive Transportation and Service Meeting, S A E

Arrangements progressing 532
Personnel of committee 444
Automotive work in the University of California (A B Domonoske) 449
Automotive worm-gear (L R Buckendale) 551, 649

Aviation

Aircraft-engine relations to the needs of naval 509
Chances of financial success 39
Commercial, present phase 38
Crop protection 12
Development of amphibian airplanes 93
Developments 569
Equipment of airports, airways and flying-fields 574
Fundamental requirements for commercial 385
Further essentials for navigating 568
Future possibilities of commercial 40
Government program regarding civil and industrial uses of 46
Legal status and control 46
Lessons learned after the war 39
Navigation 567
Operations abroad 47
Operations in United States 47
Photography 78
Photography and map-making 12
Present status of commercial 39
Public and business support 46
Stimulating period 569
Trend of amphibian airplane development 93
Wings of the fleet 574
Aviation developments (Alexander Klemin) 569

Aviation Engine

Built for Navy 216
Construction and operation 216

Axle and Wheels Division, S A E

Activities 15, 348
Personnel 299
Semi-annual meeting report 411
Axles, worm-gear 451

B

BABCOCK, GEORGE, ON HONING CYLINDER-BORES 26
Baggage handling and body standardization 487

Baggage

Handling on motorcoaches 487
Space in motorcoaches 490
Baker disc-wheel and demountable drop-center rim 630
Balance of sleeves 308
Balanced industry 508
BALDWIN, HENRY S, ON ELECTRIC DRIVE FOR GASOLINE-PROPELLED MOTOR-BUSES 359

Ball and Roller Bearings Division, S A E

Activities 348
Annual meeting report 17, 18, 85, 252
Meeting with Sectional Committee on Ball Bearings 438
Personnel 299, 508
Semi-annual meeting report 412
Ball-bearing corner radii 252

Ball Bearings

Corner-radii increased 18
International conference 437
Numbers 253
Sizes for new applications 403
Wide-type widths increased 18

Ball Bearings Sectional Committee

Meeting with S A E Ball and Roller Bearings Division 438
Representatives 514
Ball-handle threads recommended 24

Balloon Tires

Drop-center rims and 627
Drop-center rims for 552
4.40-in. casing for steel-spoke wheel 627
Indication of public acceptance for motorcoaches 478
Mileage and freedom from punctures 478
Motorcoaches 477
Proper diameter should be considered for motorcoaches 478
Use with drop-center rims 623
Balloon tires for motorcoaches (J M Linforth) 477
Balloon tires for use with drop-center rims (B J Lemon) 552, 623
BARNARD, D P, 4TH, ON LUBRICATION OF PLAIN BEARINGS 483
Base-extenders, white 173

Bases

Density reduced by organic 172
Fixing organic colors on inorganic 172

Beam

Pattern and light intensities 544
Side illumination and depth of 354
Beam patterns and light intensities (J H Hunt) 544
Bearing-numbers, proposed revision 17

Bearings

Dilution effects on friction coefficients and temperatures of 41
Lubrication of plain 483
Mechanism of oil-flow 483
Visual investigation of oil-flow 484
BEHNING, E H, ON SILENT TIMING-GEAR 453
Bethlehem Steel Co. entertains Iron and Steel Division 571
BETHUNE, JOHN, ON RECENT DEVELOPMENTS IN GEAR DESIGN AND GEAR-CUTTING 343
BETTIS, C W, ON AIRPLANE-ENGINE MAINTENANCE 246
Bevel gear as final drive 654
Big-end-bearing problem, solution in aircraft engines 620

BLACK, ARCHIBALD, ON EQUIPMENT OF AIRPORTS, AIRWAYS AND FLYING-FIELDS 574
BLANCHARD, DONALD, ON LATEST TREND IN ENGINE, CHASSIS AND BODY DESIGN 76
Blow-by prevention the first remedial step 37
Blues act chemically on carrier 172

Bodies

All-steel production shown by motion pictures 110d
Design, latest trend in 76
Body-pigments and base-extenders, white 173
Body-production session at annual meeting 4, 97
Boiling-point, detonation tendency increases with 273

Bolts and nuts, international conference 437
Bolts, chamfered point adopted for 436

Bolt, Nut and Rivet Proportions Sectional Committee

Report approved 431
Representatives 514
BOLUS, C A, ON LAPPING CYLINDER-BORES 14
BOYD, T A, ON FUEL FROM THE SERVICE STANDPOINT 641
Brake-lining wear proportional to work done 290

Brake-Linings

Effect of change of temperature on their performance 96
Factors affecting efficiency 96
Standard extended 427
Brake session at annual meeting 4, 96

Brakes

Actuation factor of floating-cam 295
Application of outside torque, effect of 289
Causes and prevention of squeaking 96, 160
Comparison of 292
Determination of points by calculus 291
Development and 340
Geometrical determination of distance moved by point 290
Heavy vehicles 288
Hydraulic 341
Mathematical analysis of requirements 340
Necessary assumptions 290
Noise produced as by phonograph 160
Rigid-shoe type of internal 288
Safety and 241
Safety the prime requirement 241
Self-actuating and non-self-actuating shoes 289
Supplementary forces assist muscular effort 288
Brakes and brake developments (John Wiggers) 340
Brakes and Brake-Testing Sectional Committee, representatives 515
Brakes for heavy vehicles (L C Huck) 288

Brakeshoes

Actuation of point at toe of 292
Actuation versus energization 289
Centering of 295
Importance of rigid 294
Movement of camshaft toward self-actuating 294
Braking-effort with journaled and with floating cams 293
Brisbane, Arthur, address at Indiana Section dinner 563
British medium-pressure tires 625
British tires for drop-center rims 624
British tubes for drop-center rims 625
British versus American rims and tires 623
British viewpoint, advantages and disadvantages of drop-center rims 626
British wheels with drop-center rims 624
BROOKS, DONALD B, ON TESTS OF CARBON DEPOSITION IN INTERNAL-COMBUSTION ENGINES 48
"Broughams" and "coaches" 485
BROWN, ROY W, ON INSTRUMENTATION AND RESULTS OF RIDING-QUALITIES TESTS 539, 593
BUCKENDALE, L R, ON ADAPTATION OF WORM GEARING TO PASSENGER CARS 451
BUCKENDALE, L R, ON AUTOMOTIVE WORM-GEAR 551, 649
BUCHANAN, JAMES A, ON GENERAL RESULTS OF THE COOPERATIVE MOTOR-TRUCK IMPACT-TESTS 552, 581
BUCKINGHAM, EARLE, ON PROBLEM OF GEAR PRODUCTION 315
Buick automobiles, improvements in (E A DeWaters) 75
Builders should standardize machine-tools 278
Bulb image, effect of auxiliary 230
Bulbs, frosted 469
Bumpers, standard height needed 15
BURKHARDT, O M, ON CAUSES OF WEAR AND CORROSION IN ENGINES 546
Business activity, present level of 570
Business meeting at semi-annual meeting 531
Business session at annual meeting 85
Buyers try to beat machine-tool prices down 318

By-Laws

Section
Approved by Council 570
Committee report 536
Proposed amendments 281

C

Cable color code proposed 571
Cable, insulated, standard revised 419
Cadillac automobiles, improvements in (W R Strickland) 75

Calibration

Accelerometer 587, 598
Apparatus for accelerometer 596
CALKINS, C H, ON WORM GEARS AND WORM-GEAR AXLES 451

Cams

Braking-effort with journaled and with floating 293
Journaled versus floating 292
Pressure 293
Throw-out and the atmospheric line 635
Value of floating 294

Camshaft

Details of inlet-valve, and valves 219
Movement of, toward self-actuating brakeshoe 294
Can motorcoaches relieve traffic congestion? (Phil B Harris) 33
CANAVAN, J J, ON NEEDED MOTOR-VEHICLE IMPROVEMENTS 566
Capital, natural flow of 267
Car mortality 113

Carbon

Character and quantity of oil affects rate of formation 50
Deposit increases thermal efficiency 52
Deposits 306
Due to oil in combustion-chamber 49
Engine performance affected by 51
Influence of other factors negligible 50
Preliminary tests to determine factors affecting formation 48
Tests of deposition in internal-combustion engines 48
Time-rate of formation 50

Carbon Deposition

Influence of temperature, fuel and oil on 548
Oil volatility, bearing of, on 612
Oils and mixture-ratios, influence of 611
Results obtained from different fuels 610
Temperature, fuel and oil, influence of 548, 607
Variations in head temperature, effect of 609
Carbon monoxide, determination of, in blood 174

Carbureters

Correct adjustment and improper-adjustment effects 389
General method of adjustment 390
Test apparatus gave starting results similar to standard 148
Warming-up phenomena 390
Carburetion, how increased heat affects 266
CAREINS, W G, ON HOW TO SELECT MACHINE-TOOLS 275
CARLSON, R E, ON HEADLIGHTING SITUATION IN THE DISTRICT OF COLUMBIA 100, 399
CARLSON, R E, ON MOTOR-VEHICLE HEADLIGHTING 77
Carnot, Sadi 370
Carter, Solon J, address at Indiana Section dinner 562
Castle-nut standard revised 254, 435
Causes and prevention of squeaking brakes (F C Stanley) 96, 160
Causes of wear and corrosion in engines (O M Burkhardt) 546
CAUTLEY, JOHN R, ON SAFETY AND BRAKES 241
Centering of brakeshoes 295

Centrifugal Pump

Cooling system use 199
Evaporative cooling-system use 7
Chain Division, S A E, personnel 299
Chains for front-end drive (F M Hawley) 454
Chairmen and secretaries standardization conferences 438
CHAMBERS, K D, ON COMPLEMENTARY-COLOR HEADLIGHTING 543, 613
Chamfered point adopted for bolts 436
Change-speed gears not eliminated by superchanger 520
CHASE, HERBERT, ON AUTOMOBILES OF TODAY AND TOMORROW 241

Chassis

Central-source, lubrication layouts 493
Design, latest trend in 76
Lubrication 446, 491
Test-stands in refrigerated laboratory 134
Chassis lubrication (Fred H Gleason) 446, 491
Chemistry, wide field for organic 530
China 138
Choosing a job 600
Chronograph acceleration recorder 595
Circulation of wet steam 198
Circulation through head jackets 311
City traffic studies by engineers needed 244
Civil aviation 46
Civilization dependent on low transportation-costs (E S Jordan) 79
CLARK, DR GEORGE L, ON INDUSTRIAL APPLICATION OF THE X-RAY 342
Cleveland automobiles, improvements in (Balfour Read) 76
"Coaches" and "broughams" 485

Coal

Four methods now available for producing motor fuel 567
Producing motor fuel from 567
Code on Colors for Traffic Signals Sectional Committee, representative 515

Coefficient of Friction

Apparatus used to determine 41
Dilution effects on 41
Coincidental locking devices (C M Manly and C B Veal) 568
COLEMAN, T E, ON RELATIONSHIPS BETWEEN LUBRICATING SYSTEMS AND ENGINE PERFORMANCE 201
COLLIAU, V, ON GRINDING CYLINDER-BORES 26
Color blindness no objection with complementary-color headlights 617
Color harmony in the automotive industry (H Ledyard Towle) 97

Colors

Available for cellulose lacquers 173
Blues act chemically on the carrier 172
Density reduced by organic base 172
Fixing organic, on inorganic bases 172
Good maroon lacquers are available 173
How produced synthetically 172
Coloring, nature and sources of pigments used in automobile 171
Combustion, water condensed from gases of 36

Combustion-Chamber

Carbon deposition due to oil in 49
Shape 305
Comfort in aircraft 180
Comfort, what, means to passengers of motorcoaches 603
Commercial aviation's present phase (D W Douglas) 38

Committees

Administrative, S A E, personnel 233
Advisory on Automobile Locks, S A E, personnel 302
Aeronautic Safety Code Sectional, representatives 514
Automotive Transportation and Service Meeting, S A E, personnel 441
Ball Bearings Sectional, representatives 514
Bolt, Nut and Rivet Proportions Sectional, representatives 514
Brakes and Brake Testing Sectional, representatives 515
Code on Colors for Traffic Signals Sectional, representative 515
Constitution, S A E, personnel 233
Definitions for Heat-Treatments, representative 508

Division of Simplified Practice Preferred List of Ball-Bearing Sizes
Activities 403
Personnel 403
Finance, S A E, personnel 233
Fuels, sub, S A E, personnel 233
Gears Sectional, representative 515
Hazards of Spray-Coating, National Safety Council, representative 508
Headlight sub, S A E, personnel 233
Highways sub, S A E, personnel 233
Insulated Wire and Cable Sectional, representatives 515
Lubricants sub, S A E, personnel 233
Machine-Tool Safety Code Sectional, representative 515
Meetings, S A E, personnel 233
Membership, S A E, personnel 233
Methods of Expressing Limits and Tolerances Sectional, personnel 302
Motor Truck, National Automobile Chamber of Commerce, activities 571
Motor-Vehicle-Fleet Operation and Maintenance, S A E, formed 570
Motor-Vehicle Lighting Specifications Sectional, representatives 514
National Safety Council, on Hazards of Spray Coating, representative 233
National Wood Utilization 388
Numbering of Steels Sectional, representatives 514
Ordnance Advisory, S A E, personnel 24
Patents, S A E, personnel 302
Pins and Washers Sectional
Activities 348
Organized 15
Representatives 514
Plain Limit Gages Sectional, representatives 515
Production Meeting, S A E, personnel 444
Publications, S A E, personnel 233
Research, S A E, personnel 233
Riding-Qualities sub, S A E, personnel 233

Compression

Cracked gasoline has high, limit 273
Permissible, in engines 306
Why higher, are demanded 271
Compressor, details of, for refrigerated laboratory 137
Concrete test-hill road 28

Condensation

Blow-by prevention first remedial step 37
High operating and oil temperatures help to prevent 45
Mixture-ratio and humidity have slight effect on 37
Condenser, details of, for refrigerated laboratory 137
Conditions that impede cooperation 317

Connectors

Off-set slot, for head-lamps proposed 425
Two-filament endorsed 74
Screw-type recommended 20
Conservation of fuels important 645
Constant-temperature system, difficulties met and overcome 264

Constitution

Section,
Approved by Council 570
Proposed amendments 281
Report of Sections Committee 536

Constitutional Amendment

Presentation at 1926 annual meeting 474
Proposed 91, 474
Withdrawn 531
Written comments on 474
Constitution Committee, S A E, personnel 233
Constitutional amendment proposed 91
Construction and equipment of refrigerated laboratory (D M Pierson) 83, 132
Consumption of fuel oil by locomotives 391

Contact Accelerometers

Applications 251
Battery of cells versus single adjustable cell 248
Characteristics 595
Development in 248
Diaphragm type 249
Dynamic tests 250
Influence of contact opening 251
Methods of indication 248
Micrometer type 249
Recording-devices 594

Continuous Distillation

Results markedly different from batch distillation 502
Simple test-apparatus 110b, 501
Translation of temperatures of motor-fuel tests to those of use 503
Continuous-distillation test of volatility 110b
Control of distribution of undifferentiated light extremely improbable 616
Controllable-beam equipment 77

Cooling Systems

Thermo-vapor 448
Types discussed 243
Cooperation, conditions that impede 317
Cooperation would reduce machine-tool costs 320
Cooperative fuel-research 349, 534
Correct carbureter adjustment and improper-adjustment effects (O H Ensign) 389
Correcting moment of aircraft 180

Corrosion

Acid formed from sulphur in fuel accelerates 36
Causes of, in engines 546
Notes on crankcase 35
Resulting from fuel 643
Symptoms and effects of crankcase 35
Water condensation the primary cause of crankcase 36
Corrosive effects, tests of gasoline 283
Cost-accounting system, standard, adopted for motorcoach operation 489
Cost of government 392

Costs

Analysis of automotive equipment operating 367
Civilization dependent on low transportation 79
Cooperation in machine-tool industry would reduce 326
Development, of machine-tool overlooked 319
Eliminating floor obstructions in motorcoach 381
Engineers design for low production 270
Facts revealed by 1 year's records 285
Ford figures questioned 387
Government 392
Initial aircraft 182
Obsolescence a major item of 369
Operating, and economic life of motor vehicles 285
Operating, of aircraft, relative 182
Records essential to successful operation of motor vehicles 286
Purposes served by motor-vehicle operating, data 285
Relation of mileage to motor-vehicle operating 286
Relation of overhaul, salvage value and new truck investment 287
Screw thread standardization and relative 131

COULOMBE, J C, ON RECTIFIER UTILIZING VACUUM AND HEAT 243

Council Meeting, S A E

December, 1925 24
January, 1926 233
April 508

Machine-Tool Safety Code Sectional Committee, representative 515

Machine-Tools

Analysis of maintenance 320
Association adopted standard data sheets 318
Automotive industry does not pay enough for 318
Automotive industry must pay price 279
Better salesmen needed 279
Better state factory inspectors needed 522
Builders should standardize 278
Buyers cause lack of standardization 319
Buyers try to beat prices down 318
Complete versus meager quotations 276
Conditions that impede cooperation 317
Confidence and cooperation needed 280
Constantly at work on design changes 317
Cooperation would reduce costs 320
Cost of development overlooked 319
Do special, receive too much attention 318
Factors to consider in selection 276
Factory inspection inadequate 522
Fluctuations in demand are excessive 322
Furnishing repair parts a nuisance 321
How to determine what to buy 276
How to select 275
Industrial fatalities outnumber war killed 522
Major factors to be considered 277
Making safe 521
Money needed for standardiation 279
More safety devices being fitted 318
Must pay for themselves quickly 322
Needs of the automotive industry 316
Other considerations sometimes important 277
Plants need inspectors 322
Power hammers safe, making 522
Problem of rebuilding 321
Rebuilding does not pay builders 322
Should demonstrate guaranteed production 320
Some common causes of trouble 277
Standard, more profitable to all 317
Standardization a knotty problem 317
Standardization up to buyers 278
State laws vary on safety guards 319
Three classes of use 275
Too little interchangeability 319
Trade soon swings over to standards 279
Users can help with statistics 321
Would rate, like fire risks 321
Machining operations on hypoid-gears 580
MacMillan expedition pictures shown at annual meeting 93

Motorcoach service planned for Westchester County (A E Hutt) 240
Motorcoach session at annual meeting 4, 104
Motorcoach transportation (A J Scaife) 335

Motorcoaches

Against and for standardization 380
Are size and life becoming excessive? 601
Baggage handling and body standardization 487
Baggage space, speed and head-room 490
Balanced structural triangle 490
Balloon tires for 477
Basic requirements of the 380
Batteries simplified 22

Body standardization 487
Builder's attitude toward changes in standard designs 379
Can, relieve traffic congestion 33
Changes requested have boomerang qualities 379
Cost of eliminating floor obstructions 381
Dependability of service essential 603
Detailed operating-data sought 375
Drivers must be of high type 602
Easy maintenance and long life important 383
Efficiency of electric drive 374
Exhaust, how handled 105
Factors that affect comfort 382
40,000,000 miles per year 566
Fundamental reasons underlying the design of the modern safety 104
Garage construction requirements 566
Gasoline-electric, operating experience with 373
Head-room 490
Head-room, ventilation and noise 382
Heating and ventilating 106
How to evaluate desired changes 383
Importance of careful route selection 602
Indication of public acceptance of balloon tires 478
Inspection important 566
Lay-over station needed in each town 602
Less noise with pneumatic tires 372
Maintenance 566
Mechanical improvements effected 104
Mechanical transmission will be improved 374
Mileage of balloon tires and freedom from punctures 478
Must compromise on desired characteristics 490
Operating-economy factors 382
Operation in cities 240
Operators' request led to improvement 380
Opposition repeats history 335
Problems
Intercity operation 601
Intercity service 240
Regulating operation 489
Proper diameter of balloon tires should be considered 478
Proposed plan for standardization 488
Railroad and the 487
Regulation by state commissions preferable 488
Requirements of service from the standpoint of the engine 240
Riding-qualities 106
Running schedule requires careful study 602
Service planned for Westchester County 240
Servicing problems in connection with 245
Six-wheel
On pneumatic tires 372
Operation 371
Smooth acceleration and high speed wanted 383
Speed 490
Standard operating-cost accounting-system adopted 489

Treasurer's report 537

Service

Dependability of motorcoach, essential 603
Design standardization for simplified 268
Flat-rate system forcing a change 269
Fuel from standpoint 641
How can be simplified 268
Remedies for squeaking brakes 161
Some problems arising from fuel 642
Still other problems 646
Serviceability and fuel consumption of engines 511

Service Men

Engineers should work with 269
Fuel economy and 645
Hiring and developing shop mechanics 564
Qualities desired in 565
Scares away weak-hearted 565

Service-Stations

Factories could insist on quality work 245
Fuel hazards in 645
Needed in connection with motorcoach operation 245
Special tools help 269
What factory should do 245
Servicing problems in connection with motorcoach operation (A E Hutt) 245
SHAPIRO, ALEXANDER, ON PROBLEMS OF INTERCITY MOTORCOACH OPERATION 240, 601
Sheet-steel fabrication (Syd Smith) 325
Sheet-steel standardization 73

Shenandoah

Control compared with MC-2 129
Loss of 182
Stability and control compared with MC-2 129
Valve system of 94
SHOEMAKER, J H, ON PRESENT-DAY FUELS AND BETTER METHODS OF UTILIZING THEM 76
Shop mechanics, hiring and developing 564
SHORT, C R, ON SUPERCHARGING INTERNAL-COMBUSTION ENGINES 81, 185
Should cylinder-bores be lapped or honed (F N Thiefels) 14
Side illumination and depth of beam 354
Silent timing-gear (E H Behning) 453
Similar characteristics of aircraft 181
Single-motor-drive coach, tests with 376
Single-sleeve engines 312
Situation in industry 170
Six-wheel motorcoach operation (W F Evans) 371
Six-wheel motor trucks 372
Size, are motorcoach life and, becoming excessive 601
SKINNER, RALPH L, ON OIL RECTIFIERS AND CRANKCASE-OIL DILUTION 242
Sky-writing advertising 11

Sleeve-Valve Engines

Balance of sleeves 308
Carbon deposits 306
Circulation through head jackets 310
Combustion-chamber shape 304
Detonation characteristics and lubrication 310
Double port in sleeve 313
Endurance tests of Knight 306
Form of ports 312
Inlet-ports 313
Junk-rings 308
Lubrication 310
Mercedes-Knight 310
Permissible compression 306
Port-opening area 307
Power required by sleeves 309
Single sleeve 312
Steel sleeves 308
Timing 308
Valve action 304
Vauxhall 314
Sleeve-valve engines (P M Heldt) 247, 303

Sleeve-Valves

Balance of 308
Steel 308
Timing of 308

Sleeves

Clearance between 310
Double port in 313
Power required by 309
Sliding, rate of lengthwise, with hypoid-gears 578
SLIGH, T S, JR, ON PROGRESS IN THE MEASUREMENT OF MOTOR-FUEL VOLATILITY 393
SLIGH, T S, JR, ON VOLATILITY OF AUTOMOBILE FUELS 547

Slip

Measurement of pneumatic and solid tire 447
Tire wear and, discussed 448
Small Tools and Machine-Tool Elements Sectional Committee, representative 515
SMITH, DAN, ON LAPPING CYLINDER-BLOCKS 40
SMITH, SYD, ON SHEET-STEEL FABRICATION 325
SNOW, HERBERT C, ON IMPROVEMENTS IN VELIE AUTOMOBILES 76
Society representatives on Sectional Committees 514
Solid-tire felloe and felloe-bands 411
Some aspects of aircraft-engine development (G J Mead) 619
Some aspects of airplane inspection (J J Feeley) 523
Soothing the internal-combustion engine (Daniel Roesch) 247
Sources of pigments used in automobile coloring, nature and 171
Souvenirs at semi-annual meeting 560
Spacing, lead-angle and tooth profile in worm gear, accuracy of 653

Spark-Plugs

Detonation affected by cylinder-head form and location of 258
Three lengths proposed 19
SPARROW, S W, ON ENGINE DESIGN AND ANTI-KNOCK FUELS 341
SPARROW, S W, ON PRESENT AND POSSIBLE IMPROVEMENTS BY THE AUTOMOTIVE MANUFACTURER 337

Specifications

Federal, on sulphur in gasoline 644
Flexible steel conduit, proposed 417
Fuels 396
Gasoline 282
Head-lamp
Extended 426
Proposed construction 425
Headlight, improved 356
Ideal locking-device 569
Mechanical headlight 356
Oil, S A E
Adopted in March, 1923 345
Reviewed 345
Revised 426
Wood-spoke cancelled 411

Speed

Crank-disc and engine, relative 634
High, wanted in motorcoaches 383
Motorcoach 490
SPICER, C W, ON PROBLEMS ENCOUNTERED IN THE DESIGN AND CONSTRUCTION OF UNIVERSAL-JOINTS 564
Spotlights, filament location in 228
Spring-suspension and riding-qualities (F C Mock) 337

Springs

Leaf 343
Riding qualities and cushion 538
Rigidity of, essential 295
Studies on the oscillation of leaf 340

Squeaking Brakes

Causes and prevention of 160
Free movement at anchor necessary 162
Lubrication often proves disastrous for silencing 162
Noise produced as by phonograph 160
Preventive measures to be taken 161
Service remedies for 161
Theory applied to facts 161
Standard bumper-height needed 15
Standard cost-accounting system adopted for motorcoach operation 489
Standard danger-lights visible 617
Standard data sheets, National Machine Tool Builders Association adopted 318
Standard machine-tools more profitable to all 317

Standardization

Against and for motorcoach 380
Brake-lining extended 427
Buyers cause lack of machine-tool 319
Design for simplified service 268
How far automotive industry goes 280
International 537
International conferences 437
Machine-tool
A knotty problem 317
Buyers cause lack of 319
Money needed for 279
Up to buyers 278
Money needed for machine-tool 279
Motorcoach body 487
Motor fuels 77
Pins and washers 15
Proposed plan for motorcoach 488
Screw thread and relative cost 131
Sheet-steel 73
Wire gage practice in United States 604
Standardization of motor fuels (Dr H C Dickinson) 77
Standardization Policy Committee, S A E, personnel 392
Standardize, builders should, machine tools 278

Standards

Army-Navy approved 411
Company and national 366
Ideal headlighting 468
International conference 403
Letter-ballot on adoption of 439
Trade soon swings over to 279

Standards Committee, S A E

Council approves report 531
Meeting
Annual meeting 85
Semi-annual meeting 530
Personnel of 1926 233, 299
Report
Annual meeting 87, 91
Semi-annual meeting 536
Semi-annual meeting announced 411
Standards department, authority of 366
STANLEY, F C, ON CAUSES AND PREVENTION OF SQUEAKING BRAKES 96, 160
Starting-crank standard proposed 423
Starting-motor mounting standard revised 416
State laws vary on safety guards for machine tools 319
States, problem of motor-vehicle administration by 605
Static tests, procedure 582
Station, lay-over, needed in each town for motorcoaches 602
Statistics, significant, for motor-vehicle traffic 500

Steam

Circulation of wet 198
Distribution in the radiator core 156

Steam-cooling (H C Harrison) 6, 76
Steam-cooling (A G Herreshoff) 9
Steam-cooling, application to aircraft and marine engines 109

Steam Cooling-System

History, principles and advantages 448
Steam-heating 158
Water-pump 157
Steam-dome capacity of engine 260
Steam-heating in steam cooling-system 158
Steam-inlet into the radiator 156
Steam-outlet from the cylinder-jacket 155
Steel industry 34
Steel-making 231
Steel-spoke wheel with drop-center rim 627

Steels

Physical-property charts, cooperative tests to be made 74
Recalescence of 388

STEWART, A L, ON DESIGN, PRODUCTION AND APPLICATION OF THE HYPOID REAR-AXLE GEAR 550, 575
STEWART, R W, ON NEEDED MOTOR-VEHICLE IMPROVEMENTS 566
STOECKEL, ROBBINS B, ON PROBLEMS OF MOTOR-VEHICLE ADMINISTRATION BY STATES 605

Storage-Batteries

Instructions cancelled 23
Monobloc containers standard revised 23
Motorcoach 23
Nomenclature extended 23
Truck lighting without 473
Storage-batteries (G W Vinal) 241

Storage Battery Division, S A E

Annual meeting report 22, 23, 252
Personnel 301

STOUT, W B, ON FUNDAMENTAL REQUIREMENTS FOR COMMERCIAL AVIATION 385
Street and highway safety 570
Street capacity for motor vehicles 500
Street-cars, advantages of, compared with motorcoach 34
Street-cars must be eliminated 244
Streets, oiling of earth roads and 358
Strength of welded tubes 47

Stresses

Formulas for hufl, general 127
Longitudinal and circumferential 127
Surface, in hypoid-gears compared 578
Unit shear in tapered section 127

STRICKLAND, W R, ON IMPROVEMENTS IN CADILLAC AUTOMOBILES 75
Strip for drop-center rim 628
Structure of industry 64
Student groups 535
Studies on the oscillation of leaf springs (N E Hendrickson) 340
Stutz automobiles, improvements in (Charles S Crawford) 76
Suggested remedy for crankcase-oil dilution (R E Wilson and R E Wilkin) 109, 163, 287, 342
Suitability of worm gearing (George H Acker) 450
Sulphur in gasoline, Federal specification on 644
Supercharger session at annual meeting 3
Superchargers (Lieut C H Ridenour) 6

Superchargers

Airplane 447
Change-speed gears not eliminated 520
Construction of 447
General types of 185
Good at right heights 6
Increase in power obtained with 519
Mercedes 24-100-hp. in automobile 518
Performance with and without 518
Power required to drive 520
Practical application of, to automobile engines 82, 516
Problem of the automobile 518
Problems analyzed 82
Rateau principle, use of 82
Roots-blower type, advantages of 447
Volumetric efficiency increased to 100 per cent 519

Supercharging

Development for passenger cars 194
Diesel-engines 194
Engines employing principles 188
History of 188
Racing engines 194
Supercharging internal-combustion engines (C R Short) 81, 185
Surface stresses in hypoid-gears compared 578
Synthesizing process for making motor fuel 567
Synthetic production of colors 172

T

Tail-lamp mounting changed 21
TAUB, ALEX, ON HIGH AVERAGE OPERATING-TEMPERATURE AND ENGINE AND CAR OPERATION 106, 255
Taxes and national income 274
Taxicab operation and control (T O Day) 338

Taxicabs

Operation and control 338
Supervision and control demonstrated 339

TAYLOR, ALBERT LEROY, ON DILUTION EFFECTS ON FRICTION COEFFICIENTS AND BEARING TEMPERATURES 41
Teaching and research 440

Temperatures

Control of cylinder, by evaporation 153
Crankcase-oil, were affected 212
Cylinders and valve-seats 262
Dilution effects on friction coefficients and bearing 41
Effect of change of brake-linings, on their performance 96
Effect of high, of "evaporation cooling" on engine and car functions 106
Engine-pull affected by 260
Engine should develop high, quickly 256
Estimating, required for starting 504
Fuel characteristics might be changed to suit conditions 151
Fuel, oil and, influence of, on carbon deposition 548, 607
High average operating, and engine and car operation 255
How water, affects oil 262
Influence of oil, fuel and, on carbon deposition 548, 607
Large water-flow aids uniformity 263
Possible disadvantages of high engine 257
Relation of, and bottoms percentage 505
Relation of engine, to oil dilution 256
Standard, of 130 deg fahr proposed for oils 346
Tests of fuels at various 148
Translation of motor-fuel test, to those of use 503
Valve-seat 262
Variations in head, effect on carbon deposition 609

TEMPLIN, E W, ON MOTORCOACH BUILDER'S ATTITUDE TOWARD CHANGES IN STANDARD DESIGNS 379
Test-board for headlights 103

Tests

Acceleration 30
Accelerometer calibration and check 587
Adulteration in oil, early, to detect 345
Advantages of indicating-device 636
Analysis of results for crankcase-oil dilution 43
Apparatus and procedure of oil, in engines 607
Apparatus gave starting results similar to standard carbureters 148
Apparatus used to determine coefficient of friction 41
Automotive proving grounds of the General Motors Corporation 12, 27
Carbon deposition, in internal-combustion engines 48
Construction and equipment of refrigerated laboratory 132
Continuous-distillation, of volatility 110b
Cooperative fuel-research, summary of results 349
Course at General Motors proving grounds 28
Deceleration 30
Dilution effects on friction coefficients and bearing temperatures 41
Dynamic, of contact accelerometers 250
Endurance, of Knight engines 306
Engine-starting 83, 147
Paige, R N, headlight 102
Flexible steel conduit and tubing 418
Fuel, at various temperatures 148
Fuels and oils used in carbon deposition 608
Gasoline and new fuel 342
Gasoline corrosive effects 283
General results of the cooperative motor-truck impact 552, 581
Headlight, equipment for 222
Headlight, procedure for 223
Headlights 352
Highway and obstruction 590
How should, be undertaken 335
Instrumentation and results of riding-qualities 539, 593
Laboratory demonstration equipment for complementary-color headlights 616
Laboratory methods and technique 335
Low-temperature car 83
Manifold conditions should govern 506
Mechanical-drive efficiency 377
Methods of preparing oil 42
Methods used for determining crankcase-oil dilution 42
Noise produced as by phonograph in brake 160
Other balloon-tire and drop-center rim, inconclusive 630
Other data on layouts for riding-qualities 540
Physical-property charts, cooperative, to be made 74
Possible disadvantages of high engine-temperatures 257
Preliminary, to determine factors affecting carbon formation 48
Progress report on engine-starting 83, 147
Refrigerated chamber, improved type of 83
Relative visibility of headlights, results showing 616
Riding-Qualities
Conclusions from 600
Records 539
Room gives —20 deg fahr conditions 133
Simple continuous-distillation apparatus for gasoline volatility 110b, 501
Single-motor-drive coach 376
Six-cylinder 75-hp engine, results of comparative 211
Standard program at proving grounds of General Motors Corporation 29
Studying charge distribution by explosion pressure 335
Tire equipment, effects of 591
Translation of temperatures of motor-fuel, to those of use 503
Truck effects 591
Volatility 394
Voltage for insulation, increased 19
Tests of carbon deposition in internal-combustion engines (Donald B Brooks) 48
THALNER, R F, ON MAKING MACHINE-TOOLS SAFE 521
Thermo-vapor-cooling system (C H Kenneweg) 448
THIEFELS, F N, ON SHOULD CYLINDER-BORES BE LAPPED OR HONED 14
THORNE, M A, ON NOTES ON CRANKCASE CORROSION 35
Thread standardization and relative cost 131
Tie-rod, radiator, design cancelled 428
Tilting reflectors and two-filament lamps 355
Time element is important in riding-qualities 539
Time-interval of air service 179
Time-rate of formation of carbon 50
Timing-gear, silent 453
Timing the indicating-device 634

Tire and Rim Division, S A E

Activities 403, 572
Personnel 302
Tire and rim session at semi-annual meeting 442, 552
Tire "standardization" in Russia 16

Tires

American 626
Application of a 4.40-in. on a drop-center rim 629
British
For drop-center rims 624
Medium-pressure 625
Versus American 623
Drop-center rims for, larger than 4.40 in 630
Effects of, equipment on tests 591
Flat, on drop-center rims 628
4.40-in tube 628
Less noise with pneumatic 372
Measurement of slip of pneumatic and solid 447
Motorcycles need straight-side rims and 630
Removing, from drop-center rims 630
Rim-spacing 15
Six-wheel motor-coaches on pneumatic 372
Slip and wear discussed 448
"Standardization" in Russia 16
Steel-spoke drop-center wheel
Advantages 628
Disadvantages 629
Wear and changes 372
Tools, special, help service-station 269
Tooth loads of hypoid-gears 578
Tooth profiles
Lead-angle and spacing, accuracy of, in worm gear 653
Hypoid-gears 578

Torque

Application of outside, effect of 289
Varying air-fuel ratios, effects with 259
Torque-drop, comparative fuel consumption and 258
TOWLE, H LEDYARD, ON COLOR HARMONY IN THE AUTOMOTIVE INDUSTRY 97
Tractor belt-speeds revised 17
Tractor in agricultural production 213

Tractor Meeting, S A E

Arrangements progressing 532
Postponed 239

Tractors

Agricultural production 213
Testing forms revised 17
Trade marks and patents 72

Traffic and Transportation

Automotive field requirements 464
Can motorcoaches relieve congestion 33
Civilization dependent on low costs 79
Cooling system, analogy to conditions 199
Electric railway lines have gained 489
Highway 604
How d'you get what way? 152
Motorcoach 335
Motor-transport-field opportunities for the automotive engineer 463
New York City's motor-vehicle problem 500
Opportunity for automotive engineer 78
Problem and the future 244
Regulations and planning 500
Remedies 440
Service 8
Significant motor-vehicle statistics 500
Street capacity 500
Street-cars must be eliminated 244
Studies by engineers needed of city 244
Studying the field for motorcoaches 33
Traffic remedies 440

Training

Automotive industry neglecting an opportunity 480
Employes in production work 53
Foremen of manufacturing organization 54
Future executives 451, 479
Making permanent in industry 63
Preliminary is needed 479
Results of 452
Results of college 480
Splendid opportunities in automotive industry 481
Supplemental modified apprenticeship course for executives 480
University can train in fundamentals only 481
Training employes in production work (Lillian M Gilbreth) 53
Training of automobile repairmen 384
Training of future executives (John Younger) 451, 479
Training the foremen of a manufacturing organization (Louis Ruthenburg) 54
Transmission Chains and Sprockets Sectional Committee, representatives 233, 515

Transmission Division, S A E

Activities 403
Annual meeting report 24
Personnel 302
Semi-annual meeting report 436

Transmissions

Mechanical, will be improved 374
Nomenclature extended 436
Transportation and Service Meeting, S A E, announced 443
Transportation service (E A Murphy) 8
Transverse shape of airship envelope 126

Treasurer's Report

Annual meeting 92
Semi-annual meeting 537

Truck Division, S A E

Activities 15
Annual meeting report 24
Truck lighting without storage-battery 473

Tubes

British, for drop-center rims 625
4.40-in 628
Strength of welded 47
Tubing and connections for central-source chassis lubrication system 495
Turbulence, value of, in abstracting heat 200
Two classifications for oiling systems 201
Two-cycle supercharged engines (Fred S Duesenberg) 545
Two-filament connectors endorsed 74
Two-filament lamps 355
Two-throw crankshaft is counterweighted 218

U

Underwriting foreign securities 507
Unit replacement versus general overhaul (H G Fallerius) 13
United States population almost 116,000,000 486

Universal-Joints

Grease, oil, flexible-disc, and cushion types 564
Peculiarities of the 564
Problems encountered in the design and construction of 564
University can train in fundamentals only 481
University laboratory research 409
Untrained intelligence suffers handicap 451
Upson, R H, on Metalclad Rigid Airship Development 94, 117
Use, Care and Protection of Abrasive Wheels Sectional Committee, representative 515

V

Valve-gears housed in removable units 219
Valve-guides inaccessible 269
Valve-opening during the cycle, variable 634
Valve-seats, temperatures of 262

Valves

Action 304
Air-relief 156
Automatic for airships, purpose of 183
Details of inlet-valve camshaft and 219
Inaccessible 269
Indicator 634
System of Shenandoah 94
Usual procedure in airships 183

Vapor-Cooling

Cylinder temperature control by 106
Effect of high temperature of, on engine and car functions 106
Vapor-cooling session at annual meeting 4, 106

Vapor Cooling-System

Construction of new 449
Thermo 448
Vapor-phase phase of the anti-knock problem (W G Leamon) 454
Vapor-phase process, possibilities for fuel 110b
Variable-closing exhaust-valves 220
Variable valve-opening during the cycle 634
Variations in head temperature, effect of 609
Vauxhall single-sleeve engine 314
Veal C B, on Coincidental Locking Devices 568
Velie automobiles, improvements in (Herbert C Snow) 76

Ventilating

Head-room and noise in motorcoaches 382
Motorcoach 106
Vertical bodily displacement 181
Vinal, G W, on Storage-Batteries 241
Viscosity, standard temperature of 130 deg fahr proposed 346

Visibility

Deaths and accidents due to poor 618
Dirt does not produce low 615
Illumination and, not synonymous 617
Relative, test results 616
Standard danger lights 617
Water drops do not produce low 615
Vocational guidance 114

Volatility

Bearing of oil, on carbon deposition 612
Detonation and gasoline, to be studied 573
Gasoline 110b, 501
Operating and starting, of fuels 393
Progress in measurement of motor-fuel 393
Simple continuous-distillation test-apparatus 110b, 501
Tests for 394
Volatility of automobile fuels (T S Sligh, Jr) 547

Volumetric Efficiency

Effects on, compared 259
Increased to 100 per cent with supercharger 519

W

Wall, W G, on Filter and Rectifier for Crankcase-Oil Contamination 243
Warming-up phenomena 390
Warner, E P, on Riding-Comfort 448
Warrington, C H, on Public and the Modern Motor-Car 339
Waste of lifting gas in airships 176

Water

Condensed from gases of combustion 36
Crankcase ventilation will reduce volume 37
Elimination from crankcase oil necessary 110
How temperature of, affects oil temperature 262
Model of MC-2 129
Water condensed from gases of combustion 36
Water-cooled versus air-cooled engines 510
Water-cooling, shortcomings of 195
Water drops do not produce low visibility 615

Water-Flow

Large, aids temperature uniformity 263
Rapid, improves hill-climbing 267
Water-inlet to cylinder-jacket 155
Water-level and steam-dome capacity 260
Water-pipe flange, standard revised 428
Water-pump in steam cooling-system 157
Water recovery in airships 177

Wear

Causes of, in engines 546
Tire 372

Weights

Aircraft powerplant 178
Distribution of aircraft 178
Relation of, to load of aircraft 178
Size and, affect aircraft engines 510
Welborn, A P, on Hiring and Developing Shop Mechanics 564
Welding of aluminum 392
What happens when an automobile headlight is out of focus (L C Porter and G F Prideaux) 100, 222
What operator can do to improve performance (J W Lord) 337

Wheels

Ash wire 630
Baker disc, and demountable drop-center rim 630
British, with drop-center rims 624
Development work needed, more 630
4.40-in casing for the steel-spoke 627
Steel-spoke drop-center
Advantages 628
Disadvantages 629
Steel-spoke, with drop-center rim 627
When should a truck be retired (C W Sater) 14
White body-pigments and base-extenders 173
Why apprenticeship pays 606
Why higher compressions are demanded 271
Wiggers, John, on Brakes and Brake Developments 340
Wildhaber, Ernest, on Design, Production and Application of Hypoid Rear-Axle Gear 550, 575
Wilkin, Robert E, on Suggested Remedy for Crankcase-Oil Dilution 109, 163, 287, 342
Wilson, R E, on Suggested Remedy for Crankcase-Oil Dilution 109, 163, 287, 342
Wings of the fleet (H S Kendall) 574
Wire and Sheet-Metal Gaging Sectional Committee to be organized 347
Wire gage practice in the United States 604
Wood-spoke specifications cancelled 411
Wood Utilization, National Committee on 388
Work, de-organizing for 232
World's motor fuel, sources of 642
Worm-drive, passenger car 551

Worm-Gearing

Adaptation to passenger cars 451
Freedom from knocking 654
Mathematics of 651
Salient features of 652
Suitability of 450
Typical types of 649
Worm-gear axles and 451

Worm Gears

Accuracy of tooth profile, lead-angle and spacing 653
Advantages of underslung 650
Automotive 551, 649
Departure from involute form 651
Details of 451
Drive for passenger cars 451
Hindley or hour-glass type 652
Special requirements for passenger carrying 650
Worm gears and worm-gear axles (C H Calkins) 451
Wotton, E, on Maintenance with Fleet Operation 566

X

X-ray, industrial application of 342

Y

Yale University, Sheffield Scientific School research work 410
Younger, John, on Training of Future Executives 451, 479

Z

Zehring, Paul H, on Radiators 243
Zinc Coating of Iron and Steel Sectional Committee, representatives 515
Zwebal, Stanley, on Improvements in Marmon Automobiles 76
